QUEST_LOG (EXPERIENCE)

Senior Game Developer

2021 – PRESENT

Borcelle

- Led the design and implementation of core gameplay systems ensuring performance optimization and seamless player experiences across platforms.
- Maintained scalable game features while collaborating with artists and designers to translate creative concepts into functional mechanics.
- Oversaw debugging, testing, and performance tuning processes to ensure stable releases and adherence to development timelines.

Game Developer

2018 – 2021

Rimberio

- Developed gameplay mechanics and integrated assets using industry-standard game engines and development frameworks.
- Optimized rendering pipelines and system performance to enhance frame rates and user interaction quality.
- Collaborated in agile production cycles contributing to feature planning, iteration, and deployment milestones.
- Supported asset integration, UI implementation, and scripting for interactive game environments.

Game Development Intern

2016 – 2018

Borcelle

- Assisted in implementing gameplay features and resolving technical issues under senior developer supervision.
- Supported development teams in scripting gameplay components and testing prototype builds.
- Participated in testing procedures and maintained technical documentation to support stable builds.
